#### **TECHNOLOGIES**

#### **FLEXFIT® TECH**

Our revolutionary technology weaves polyurethane spandex throughout the cap's crown for an incredibly secure and comfortable fit.

#### **COOL & DRY**

This technology wicks perspiration away from your body and keeps you cool, dry and comfortable.

#### **FLEXFIT MESH**

Our patented elastic trucker mesh provides superior comfort and innovation amongst trucker caps. Who said trucker caps can only be in adjustable styles?

#### PRO-FORMANCE®

Our in-house Pro-Formance® technology combines Cool & Dry properties with the premium look and feel of wool fabric.

#### **BAMBOO**

Our bamboo fabric is anti-bacterial and offers UV protection, while also exhibiting a super-soft feel with a natural shine.

#### **ULTRAFIBRE**

Featuring super synthetic fibers, Ultrafibre caps are versatile – they are robust, lightweight and wind and water resistant. The fibers also have a natural shine that emanates strength.

#### **PERMACURY®**

Our visors come with a technology that maintain its proper shape and curve at all times.

#### CAP COMPONENTS

#### **PROFILE**

Profile refers to the slope of the cap's crown. The crowns on low profile caps tend to be more sweeping towards the back, while crowns on high profile caps tend to be more perpendicular to the visor. The buckram, which is the liner inside the hat, helps maintain a cap's profile. In essence, a "low profile" cap has a shallow crown, while a "high profile" cap has a taller crown.

#### **VISOR**

The visor is the part of the hat that sticks out and shields your eyes from the sun. Visors differ in shape from curved to flat, offering a different look/shape for each hat depending on the visor shape.

#### **CROWN**

The crown is the height from the bottom edge of the hat to the top of the head or "crown". This distance helps determine how the hat will sit on top of the head. A larger number means the hat will sit low on the head.

#### **PANELS**

Each hat is comprised of panels attached by seams to form the overall shape of the hat. Hats can range from 5 to 6 panels, depending on the style of hat.

## FLEXFIT DELTA®

SEAMLESS TECH

Flexfit Delta is a revolutionary cap that is the lighter, sleeker, smarter and more comfortable choice. It couples a seamless, precision finish with a light-weight visor fabrication and a new 3-Layer multifunction sweatband. There's even patent-pending stain block tech that prevents sweat staining on the cap's crown. 1 row of stitching on visor.
